 \_\_\_\_\_ )

People learn about fish in the book by looking at pictures and figures of real sea fish and learn the features of each fish. After that they learn taxonomy of fish, which defines groups of fish based on the basis of shared characteristics and gives names to those groups.

But this is not the only things that they learn in sea schools.

 \_\_\_\_\_ )

However, besides basic skills of swimming they have to learn some special techniques required for professional divers. The aquatic environment varies with the one on the ground. There is not enough air for people to breathe in the sea. So they need to bring oxygen tanks with them to help themselves breath, while submerged in water.
