8. Are (him / you) two relatives?

### Exercise

Choose three sentences from the answer and say them in 3 seconds to your teacher without your book.

## Unit [01] Rainbow Beaches

# UNIT 01

**Are you** a beach maniac? There are different types of beaches worldwide. They can be surprising or astonishing. Ready to explore different types of beaches with me? Here we go!

Let's start with a hot water beach. Visitors dig holes near the shore, and warm water comes up from under the sand.

Have you ever seen a sparkling beach? The glass beach is made of glass waste dumped into the ocean for many years. Over time, waves and rocks smoothed the glass. Today, **★it** looks like gems and makes the beach shine.

**Are you** thinking that beaches are all near the shore? Surprisingly, not all beaches are near the sea. Sometimes, water from the underground tunnels creates a beach **surrounded** by land.

Have you ever seen a black sand beach? **Rare** turtles come to this black sand beach. A volcano formed tiny pieces of black rock in the sand. This mix gives the beach its iconic black color.

The pink sand beach looks just like cotton candy. This is because pieces of red shells and white sand are mixed. Beaches can be colored in white, black, red, and even green.

What are your favorite beaches?
